

New Safest Together App Information

British Transport Police.

Something that we have seen as a growing concern in Cluster and Partnership meetings is the way in which people, young people in particular, behave on our rail networks. Traveling without paying, anti-social behaviour and other risk-taking behaviour is becoming an increasing concern for us all. It also leads to increases in these behaviours in areas where young people meet, but might not be local to the area.

One thing that might help is an app that commuters are being encouraged to use to help challenge and report issues. Details of the app can be found here. [Safest Together.
